

PROCESS AND PERFORMANCE MANAGEMENT

Process and Performance Management is an extension of the Operations Department of Boone County Schools that support project teams by improving their processes and solving problems effectively. This happens through training, coaching, and mentoring team members in the use of quality tools. Our approach will help us maintain the balance between innovation and sustainability in reaching the goals set forth in our District's Strategic Plan.

Our Mission: To find better processes in order to maintain a high level of student and operational performance.

Our Vision: To be committed to increasing efficiency and effectiveness that will guarantee the resources needed to ensure every student is College, Career, and Life ready.
